Household Gods.

The ancient Greeks believed that the Penates were the gods who attended to the welfare and prosperity of the family. They were worshipped as household gods in every home. The household god of today is Dr. King's New Discovery. For consumption, coughs, colds, and for all affections of throat, chest and lungs it is invaluable. It has been tried for a quarter of a century and is guaranteed to cure, or money returned. No household should be without this good angel. It is pleasant to take and a safe and sure remedy for old and young. Free trial bottles at Will E. Collins & Co., and J. S. Haggart's.

USEFUL PLANTS.

There Are About Fifteen Thousand, Some of Them Very Valuable.

Plants useful to man are estimated to number about 15,000. Among them are 5,000 roughly classed as economic and food plants. The above includes 1,100 edible fruits and berries and 800 edible seeds. Fifty are reckoned among the cereals and 40 as uncultivated edible graminaceous seeds. Four hundred and twenty are classed as vegetables and salads, and 260 are listed among the tubers.

There are 37 of the onion group and 32 of arrowroot. From 89 plants sugar may be obtained in paying quantities. Vinous drinks are obtained from 200 plants, aromatics from 266. There are 50 substitutes for coffee and 129 for tea. Tannin is present in countless plants and has been mentioned in 141 and caoutchouc (india rubber) in 96. The near relative of this substance, gutta percha, named from one plant, has been found in at least seven, while resin and balsamic gums are yielded by not less than 389. There are 10 wax trees and shrubs and 330 which have been made to yield essential oils. From 88 different plants potash, soda and iodine have been extracted, and 650 are of use to the dyer and to make ink.

About 300 have fibers that are of use in the textile arts. Forty-four or more are used in making paper. Forty-eight have been utilized in making roofing preparations, and 740 have been turned to account in miscellaneous building operations. Of all plants known only 615 are known to be in any degree poisonous. Popular Science News.

THE GOLD DEMOCRATS.

Working Hard to Keep the Honest Money Men in Line.

The activity which the gold Democrats are showing in the states in which they have tickets in the field has a profound significance in its bearing on the congressional canvass of 1898 and the presidential campaign of 1900. Ordinarily but little interest is taken in politics in the year immediately succeeding a presidential contest. The tension and excitement of a struggle for president creates an exhaustion which usually is not overcome until the congressional election two years later. Thus the elections which occur 12 months after the big contest seldom arouse general interest throughout the country. Moreover, the elections in those years are comparatively few and unimportant and thus help to augment the general apathy.

Naturally this apathy hits a third party—and the gold Democracy, notwithstanding the actual historical continuity which it holds to the party of Jefferson and Jackson, will have to be called a "third" party until the majority end of it drops Bryanism and gets back to its old ground on the money issue—harder than it does either of the great organizations. The gold Democrats, however, in such states as Ohio, Kentucky, Nebraska and Iowa, in which they have tickets in the field, are revealing a greater earnestness than they displayed last year and undoubtedly will poll a larger vote than was given to Palmer in those states. The gold Democratic demonstration in the spring election in Michigan, in which that element cast five times as many votes as were given to Palmer in that state half a year earlier, encouraged it to make a powerful rally in the fall elections.

A large vote for the gold Democratic tickets in the elections a few weeks hence will incite that party to put up state tickets and congressional candidates in 1898 and will prepare the way for a vigorous canvass on its part in 1900. The Bryanites are sure to make a fight in 1900, and the finance question in some phase or other is going to be involved in the canvass. Probably the Bryanites will all have dropped to greenbackism by that time. Bryan has been stumping Iowa with his fellow greenbacker, James B. Weaver, who was the Greenback party's presidential candidate in 1890 and the standard bearer of that party's Populist descendants in 1892, when Bryan stumped and voted for him. The Bryan Democrats will have to get one more crushing defeat before they drop their financial and social lunacies and follies, and it is to the country's interest that the Palmer and Cleveland Democrats maintain their organization and keep the honest money men of their party from drifting to Bryan.
